

Study 50 plus / „QuEo“, the counties state capital Schwerin, Hanseatic city Wismar and Landkreis Nordwestmecklenburg - final report

In this study within the employment package "Qualification and Experience Offensive" (QuEo) and the circles involved, demographically based forecasts on the labor market trends for the age group 50 plus (AGR 50 plus) in northeastern Germany up to 2020 (optionally until 2030) are made. Attention is paid to the development of unemployment figures according to the legal code SGB II.

The IFAD has introduced an indicator, the "Working Age Index 50 plus" (EAX 50plus), for comparability and calculation of the expected share of AGR 50plus in the labor force as a whole. Another demographically based method, the "Model for Estimation", is used to predict the expected number of SGBII receivers in the EGR 50plus.

In this booklet, the respective demographic situation in the individual districts and the QuEo employment package are presented. The demographic future of the AGR 50plus is mapped out on the basis of existing population forecasts up to 2030. The baby boomers of the post-war years will increasingly shift to the AGR 50plus. By 2020, the AGR 50plus will provide the largest share of the employable. The EAX 50plus will therefore increase significantly, and with it the importance of the AGR 50plus for the labor market. For the analysis of unemployment in AGR 50, differentiated according to the legal groups SGBII and SGBIII, the annual average values and the absolute unemployment figures are used in comparison with unemployment.

QuEo is an employment pact in northeastern Germany, which includes the working groups for basic security (ARGE) in Northwest Mecklenburg, the state capital Schwerin, the Hanseatic city of Wismar and a six-member association. As part of the federal program "Perspective 50 plus - employment pacts for older people in the regions", QuEo has the goal of permanently integrating older unemployed people into the 1st job market.
